Professional Experience

Principal Economist, Amazon December 2021 - Present
Seattle

- Leading cross-functional high-impact projects spanning Operations, PR, Policy, Legal and other domains; driving strategic decisions through data deep dives and innovative model implementations.
- Led an empirical evaluation of Amazon's logistics network on local economic outcomes; published results in a top policy journal and drove strategic outreach to media and policy leaders.
- Spearheaded a randomized control trial of a major safety program across 300+ facilities and 0.5 million workers reducing stress injuries among new hires by double digits
- Developed and implemented pricing models for innovative new ad products

Associate Professor in Economics, University of Sussex August 2013 - July 2022
Brighton, UK

- Modernized economics curricula by designing and introducing 'Financial Economics' and 'Big Data in Economics' final year electives that boosted student placement in Finance; supervised PhD students; hired and mentored junior faculty; published influential research, and contributed to academic discourse and policy making.

Lecturer, London School of Economics September 2010 - July 2013
London, UK

- Taught Microeconomics and Game Theory courses; supervised Masters students theses; published and presented research extensively.

- Designed and taught the summer school Game Theory and Strategy course from 2013 to 2019.

Associate, Cornerstone Research
San Francisco

August 2008 - August 2010

- Lead teams in analyzing market behaviors for litigation cases, and in econometric modeling, and report preparation, significantly contributing to case success through expert collaboration.

Consultant, The World Bank
Washington DC

August 2007 - August 2008

- Led the development of a pivotal report on financial access, managing surveys, data analysis, and drafting, impacting global financial policy discussions.

Interest Rate FX Trader, UBS
London, UK

August 2001 - August 2002

- Priced, traded, and hedged OTC options on the Euro yield curve; managed book PL; and analyzed Euro treasury market movements.

Technical Officer, World Health Organization (WHO)
Geneva, Switzerland

1996-2000

- Published the first global survey on private sector's impact on TB in developing countries; designed, tested and launched the first set of Public-Private mix care models that now operate across more than 12 countries.

Consulting Experience
